Optimising and Accelerating the Internet Experience

Delivered in partnership with STC and the London Internet Exchange (LINX), JEDIX is optimising how end users experience the Internet and enabling regional and global businesses to peer at a central meeting point for international connectivity.

It brings together state-of-the-art facilities, terrestrial connectivity and subsea cable infrastructure with a unique vision for global peering at the heart of the Middle East. We enable an open, accessible and trusted peering exchange that is focused on streamlining how customers get connected and optimising end user experience.

…focused on streamlining how customers get connected and optimising end user experience.

When Carriers, Cloud Service Providers and Content Providers choose JEDIX, they rapidly expand their peering options in a geographic location that creates competitive advantages. Located on the edge of the Red Sea, network-dependent businesses can quickly and efficiently connect to peering partners in Africa, Asia, the Middle East as well as Europe and beyond.

This is only the beginning for JEDIX and we see our exchange adding value in key destinations across the Middle East. We look forward to you joining us on this journey.

Through openness and collaboration, we can create the Middle East's Digital future.

Join the Region's Most Dynamic Digital Hub

Uniting Digital Businesses across the Middle East, Asia and Africa with open, and direct access to regional and global networks

Why Choose JEDIX?

A True Global Hub
JEDIX is ideally situated at the heart of the MENA region, providing a central hub for Carriers, Content and Cloud Providers across the Middle East, Africa and Asia

Direct Regional Access
STC's terrestrial fibre network provides direct access to nine GCC countries high reliability and low-latency connectivity

Ultra-Secure Facility
JEDIX is protected with state-of-the-art surveillance and security systems located in MG1, a world-class Tier IV Data Centre owned and operated by STC
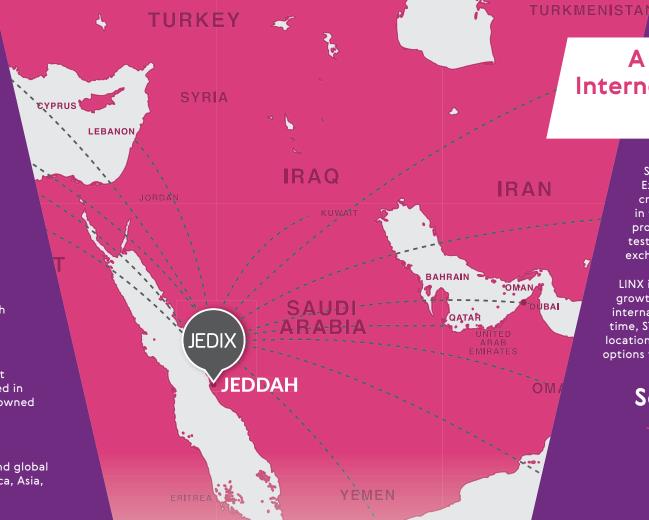

Dense Subsea Cable Connectivity
Jeddah is a landing point for regional and global subsea cable systems that connect Africa, Asia, Europe and the Middle East

Open for Business
Jeddah is emerging as an international business hub and destination for global corporations with an open and business-friendly environment

A Rapidly Growing Peering Exchange
JEDIX is a rapidly growing peering exchange point with new members from across the globe offering an increasing number of peering options

A World-Class Internet Exchange Partner

STC and London Internet Exchange (LINX) have partnered to create a thriving peering exchange in the Middle East. LINX has a proven track record of building, testing and delivering world-class exchange solutions.

LINX is helping STC to accelerate the growth of Jeddah as an open and international Digital Hub. At the same time, STC and LINX will grow in new locations and give its members new options for peering in the region.
